## **HOMOGENEOUS GRANULES**

The secret of even distribution and quality turf growth

A homogeneous fertilizer provides a more uniform distribution of plant nutrients. Unlike a blend, every homogeneous particle contains all of the guaranteed nutrients - nitrogen, phosphorus, potash and iron, in the proper proportions. Your plants receive a complete feeding from every granule for optimum growth and color.

## **DIRECTIONS FOR USE**

Apply anytime during the turf growing season; however, when weather is extremely hot, it is best to delay or reduce fertilizer applications.
