FIRE AND EXPLOSION HAZARD DATA

SEE DATA SECTIONS FOR ADDITIONAL INFORMATION.
AUTO-IGNITION TEMPERATURE: No ignition up to 1382 deg F,
750 deg C.
EXTINGUISHER MEDIA: CO2 or dry chemical.
FIRE AND EXPLOSION HAZARDS: If product is involved in fire,
noxious, toxic fumes may be produced.
FIRE-FIGHTING EQUIPMENT: Wear positive-pressure, self-
contained breathing apparatus and use full protective
equipment.

REACTIVITY DATA

STABILITY (CONDITIONS TO AVOID): None known.
INCOMPATIBILITY (SPECIFIC MATERIALS TO AVOID): None known.
HAZARDOUS DECOMPOSITION PRODUCTS: Will emit toxic vapors as
it burns.
HAZARDOUS POLYMERIZATION: Does not occur.

ENVIRONMENTAL AND DISPOSAL INFORMATION

ENVIRONMENTAL DATA: This pesticide is toxic to fish. Do not apply directly to water or wetlands (swamps, bogs or marshes). Drift or runoff from treatment areas may be hazardous to aquatic organisms in neighboring aquatic sites. Do not contaminate water when disposing of equipment washwaters.

ACTION TO TAKE FOR SPILLS: Contain and sweep up material of small spills and dispose as waste. Large spills report to CHEMTREC and DowElanco for assistance. Prevent runoff.

DISPOSAL METHOD: Do not contaminate water, food or feed by storage or disposal. Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility in accordance with applicable regulations.

HEALTH HAZARD DATA

EYES: May cause slight irritation with transient corneal injury.

SKIN CONTACT: Prolonged exposure not likely to cause significant skin irritation. Prolonged or frequently repeated skin contact may cause allergic skin reactions in some individuals. With the dilute mix, no allergic skin reaction is expected.

SKIN ABSORPTION: A single prolonged exposure is not likely to result in the material being absorbed through skin in harmful amounts. The LD50 for skin absorption in rabbits is >2000 mg/kg.

INGESTION: Single dose oral toxicity is believed to be low. The oral LD50 for the components are >5000 mg/kg in rats. Small amounts swallowed incidental to normal handling operations are not likely to cause injury; swallowing amounts larger than that may cause injury.

INHALATION: Dust may cause irritation to upper respiratory tract.

SYSTEMIC (OTHER TARGET ORGAN) EFFECTS: In animals, active ingredient has been shown to cause kidney effects. Repeated excessive exposures to dust may cause upper respiratory tract irritation. May contain silica which may cause lung effects with repeated excessive exposure.

CANCER INFORMATION: A low incidence of urinary tract tumors was seen in only 1 of 5 chronic studies in rats with the active ingredient, and it is not anticipated to be a carcinogenic risk. The clay component may contain crystalline silica, which has caused cancer in laboratory animals and is listed as a potential carcinogen by IARC.

TERATOLOGY (BIRTH DEFECTS): The active ingredient did not cause birth defects; other fetal effects occurred only at doses toxic to the mother.

REPRODUCTIVE EFFECTS: The active ingredient did not interfere with reproduction in animal studies.

MUTAGENICITY (EFFECTS ON GENETIC MATERIAL): Mutagenicity testing with the active ingredient has been negative in most in vivo and in vitro systems. Positive results in a Drosophila study are contradicted by results in in-vivo mammalian tests.

FIRST AID

EYES: Flush eyes with plenty of water; call a physician.

SKIN: Wash off in flowing water or shower; use soap if available. Get medical attention if irritation develops. Wash all contaminated clothing before reuse.

INGESTION: Call a physician or Poison Control Center. Drink 1 or 2 glasses of water and induce vomiting by touching back of throat with finger. Do not induce vomiting or give anything by mouth to an unconscious person.

TOXIC SUBSTANCES CONTROL ACT (TSCA): All ingredients are on the TSCA inventory or are not required to be listed on the TSCA inventory.

OSHA HAZARD COMMUNICATION STANDARD: This product is a "Hazardous Chemical" as defined by the OSHA Hazard Communication Standard, 29 CFR 1910.1200.

NATIONAL FIRE PROTECTION ASSOCIATION (NFPA) RATINGS:
HEALTH: 2 FLAMMABILITY: 1 REACTIVITY: 0

INHALATION: Remove individual to fresh air. If breathing difficulty occurs, get medical attention. If not breathing, provide cardiopulmonary resuscitation assistance (mouth-to-mouth) and get medical attention immediately.

NOTE TO PHYSICIAN: No specific antidote. Supportive care. Treatment based on judgment of the physician in response to reactions of the patient.

MEDICAL CONDITIONS GENERALLY AGGRAVATED BY EXPOSURE: No corroborative information is available that would establish the aggravation of a medical condition by exposure to TREFLAN 5G; however, it is a reasonable assumption that highly allergic individuals would be at a somewhat greater risk for demonstrating an allergic reaction when exposed.

HANDLING PRECAUTIONS

EXPOSURE GUIDELINE(S): Trifluralin, PEL and TLV not established; Kerosene, PEL not established, TLV not established (NIOSH recommended 10 hour TWA: 14 ppm).

VENTILATION: Provide general and/or local exhaust ventilation to control airborne levels below the recommended exposure guideline.

RESPIRATORY PROTECTION: In dusty atmospheres, use an approved dust respirator.

SKIN PROTECTION: Use protective clothing such as coveralls, a long sleeved shirt, and impermeable gloves when handling this product.

EYE PROTECTION: Use safety glasses.

ADDITIONAL INFORMATION

SPECIAL PRECAUTIONS TO BE TAKEN IN HANDLING AND STORAGE: Keep out of reach of children. Causes eye irritation. Harmful if swallowed, inhaled or absorbed through the skin. Avoid breathing particulate material and contact with eyes, skin or clothing. Wash thoroughly with soap and water after handling. Remove contaminated clothing and wash before reuse.

MSDS STATUS: Revised regsheet 8/93.

REGULATORY INFORMATION: (Not meant to be all-inclusive--selected regulations represented).

NOTICE: The information herein is presented in good faith and believed to be accurate as the effective date shown above. However, no warranty, express or implied, is given.
